```
// Super Class
class a
{
    int i=5;
    class b
    {
        void play ()
        {
            System.out.println (i);
        }
    }
    public static void main (String args [])
    {
        ao = new a ();
        bp = new b ();
    }
        p.play ();
}
```

Exceptional Handling :-

→ Interrupt Error

Acquire Interrupt → is a state

↓ PORT

① Logical error

② Syntax error.

μI/NMI String

TSR

Methods of E H :-

ty , throw, catch , Finally

throws

```java
public class rbt
{
    public static void main (string argv[])
    {

        fu();  fu();  fu();
    }
    public void. fu()
    {
        int i=1;
        System.out.println (i++);
    }
}
```

Acces Modifiers in Java:-

	B	D	P
Public	✓	✓	✓
Private	✓	✗	✗
Protected	✓	✓	✓

Default => Extra Access Modifier.
